Excerpt:

A GT2 belt clip that is compact, lightweight, strong. no slip and easy to tension.

Description:

 This piece can be used to close GT2 belts or attach belts to fixed points that take an M3 screw.
 The tension can be adjusted one tooth at a time, to adjust first loosen the M3 screw, pull the belt from the free end then tighten the screw back.
 Can be tightened with M3 screws or even zip ties if the weight is an issue (even with zip ties it will still retain its no-slip property).
 Hint: the part is designed for 6mm wide belts, if your belt is different try scaling in the Z-axis accordingly.

If you can, please use the online documentation found at <http://www.youmagine.com/designs/tough-belt-clip> because those may have been be updated. Also, there you can interact and provide praise and/or feedback.
